

Project Proposal

WEDE5020 Portfolio of Evidence (POE)

Website Title

Sweet Delights Bakery

Student Information

Student Name: Xihlovo Neol Baloyi

Module: WEDE5020 – Web Development

Project: Portfolio of Evidence (POE)

1. Introduction

This project proposes the design and development of a professional, responsive website for **Sweet Delights Bakery**. The website will provide visitors with information about the bakery, showcase products, display a gallery of baked goods, and offer an easy way for customers to make enquiries through an online contact form.

The website will be built using HTML5, CSS3, and JavaScript while following modern web design principles, accessibility guidelines, and responsive design techniques.

2. Project Purpose

The purpose of this website is to establish an online presence for Sweet Delights Bakery by providing customers with easy access to information about the business, its products, and contact details.

The website will also demonstrate practical web development skills acquired during the WEDE5020 module.

3. Project Objectives

The project aims to:

- Design a professional and attractive website.
- Create a responsive layout for desktop, tablet, and mobile devices.
- Provide easy navigation between pages.
- Display bakery products and services.
- Implement a functional contact form.
- Improve user experience through modern interface design.
- Apply HTML5, CSS3, and JavaScript best practices.

4. Target Audience

The website is intended for:

- Local bakery customers.
- Families.
- Event planners.
- Wedding clients.
- Corporate customers.
- Visitors looking for custom cakes and baked goods.

5. Website Pages

The website will consist of the following pages:

- Home
- About
- Services
- Gallery
- Contact

6. Features

The website will include:

- Responsive navigation menu
- Hero banner
- Image gallery
- Service cards
- Contact form
- Client-side form validation
- CSS animations
- Interactive JavaScript features
- Footer with social media links
- Google Maps integration (optional)

7. Technologies Used

- HTML5
- CSS3
- JavaScript
- Visual Studio Code
- Git
- GitHub

8. Expected Outcomes

Upon completion, the project will provide a professional, user-friendly website that effectively promotes Sweet Delights Bakery while demonstrating modern web development skills and responsive design principles.

9. Conclusion

The Sweet Delights Bakery website will provide customers with a visually appealing and informative online experience. The project will demonstrate the practical application of web development concepts covered in the WEDE5020 module and showcase the ability to design, develop, and deploy a complete responsive website.
