

Research Report

WEDE5020 Portfolio of Evidence

Website Project

Sweet Delights Bakery

1. Introduction

This research report supports the planning and development of the Sweet Delights Bakery website. The purpose is to understand the target audience, identify website requirements, review current design trends, and select suitable technologies for developing a professional, responsive website.

2. Business Overview

Sweet Delights Bakery is a local bakery that offers freshly baked bread, cakes, cupcakes, pastries, cookies, and custom cakes for birthdays, weddings, and special occasions.

The website aims to improve the bakery's online presence, attract new customers, and make it easier for customers to learn about products and contact the business.

3. Target Audience

The intended audience includes:

- Families

- Students
- Working professionals
- Event planners
- Wedding clients
- Local businesses
- Customers seeking custom cakes

4. Website Requirements

The website should include:

- Responsive design
- Easy navigation
- Product gallery
- Services page
- Contact form
- Business information
- Mobile-friendly layout
- Fast loading pages
- Accessible content

5. Design Research

The following design principles were selected:

- Clean layout
- Consistent colour palette
- Readable typography
- High-quality images
- Clear navigation menu
- Prominent call-to-action buttons
- Simple contact process

6. Technologies

The project will use:

- HTML5
- CSS3
- JavaScript
- Git
- GitHub
- Visual Studio Code

7. Accessibility

The website will include:

- Semantic HTML
- Alternative text for images
- Proper heading structure
- Keyboard-friendly navigation
- Colour contrast for readability
- Responsive design

8. Conclusion

The research supports the development of a modern, responsive, and user-friendly website that meets the needs of both the business and its customers while demonstrating the web development skills required for the WEDE5020 Portfolio of Evidence.
